

Thiele AutoTrim[®] 7116 Chemical Packer

Features

- Completely automatic system
- In-line operation to maintain bag top control
- Integrated, two-stage feed that ensures accuracies and maintains speed
- Positive auger control that handles a variety of products while minimizing dust
- Tube-in-bag filling provides product and dust control
- Automatic fill time adjustments and immediate data
- Removable feeder
- Corrosion resistant

Thiele 7116 AutoTrim[®] Chemical Packer

The Thiele Series 7116 Chemical Packer is a completely automatic, integrated bag packaging system that offers bag feeding, registration and positive bag opening, dual auger product handling and bulk filling, vibratory top-off station, and positive bag control throughout the system.

The chemical packer features a feeder section that is designed to handle a variety of products. The dual bulk and dribble auger feeder system is capable of feeding many hard-to-handle products.

Key Benefits

- No manual labor required
- Better dust control
- Increased speed
- Enhanced accuracy
- Automatic bag registration
- Integrated bag settler mechanism

Additional Features

- 304 stainless steel product contact surfaces

Specifications

Production Speed

Up to 10 bags per minute

Power Requirements

Input Power	240/480 V, 1 phase, 60 Hz
Control Circuit	115 volts provided through control transformer
Maximum Draw	240/480 Volts

Air Requirements

Operating Pressure	80 psi (5.4 Atm)
Line Pressure	90 psi (6.1 Atm)
Free Air Per Cycle	1.5 cubic ft.

Shipping Weight

Approximately 7,000 lbs. (3,175 kg)
