

ISB OPVIEW HMI

Replaces the HMI of the Hayssen ISB built prior to 2026 with updated OpView™ software for improved user experience and advanced hardware.

ADVANTAGES

- Award winning design for operator ease-of-use
- Engineered with Allen-Bradley's advanced Optix HMI hardware
- OpView HMI operator benefits:
 - Quick Start Guide for easy onboarding and as needed refresher training
 - Functional descriptions of each HMI parameter for increased operator knowledge
 - Logical and simple to follow on-screen navigation
 - Easily identifiable parameter changes from loaded machine recipes
 - OpOptimizer™ technology gives step-by-step instructions to maximize machine speed

The OpView™ HMI has been recognized for design excellence with its smart user interface (UI) and has won two IF Design Awards, a prestigious global organization that evaluates design excellence across many industries.

INCLUDES

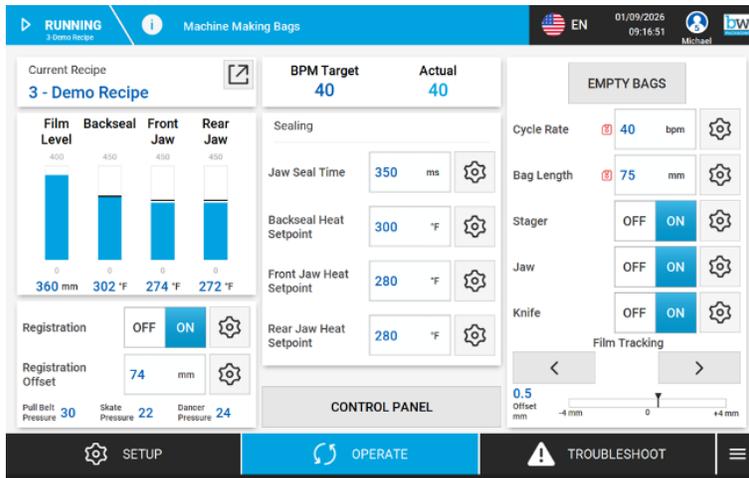

- Allen-Bradley Optix HMI hardware
- BW Packaging OpView HMI software

INSTALLATION

- Installation is completed by a factory trained BW Packaging Service Technician or your personnel with supplied instruction and appropriate PLC/HMI software capability.

MODEL COMPATIBILITY

- Conversion can be retrofitted to all Hayssen ISB machines
